⚠ COMPREHENSIVE METABOLIC PANEL

MCH	29.3	Reference Range: 27.0-33.0 pg

⚠ MCHC For adults, a slight decrease in the calculated MCHC value (in the range of 30 to 32 g/dL) is most likely not clinically significant; however, it should be interpreted with caution in correlation with other red cell parameters and the patient's clinical condition.	31.1 L	Reference Range: 32.0-36.0 g/dL

⚠ HEMOGLOBIN A1c

Analyte	Value	
⚠ HEMOGLOBIN A1c For someone without known diabetes, a hemoglobin A1c value between 5.7% and 6.4% is consistent with prediabetes and should be confirmed with a follow-up test. For someone with known diabetes, a value <7% indicates that their diabetes is well controlled. A1c targets should be individualized based on duration of diabetes, age, comorbid conditions, and other considerations. This assay result is consistent with an increased risk of diabetes. Currently, no consensus exists regarding use of hemoglobin A1c for diagnosis of diabetes for children.	6.3 H	Reference Range: <5.7 %

QUEST AD DETECT® APOE ISOFORM, PLASMA

Analyte	Value

QUEST AD DETECT® APOE ISOFORM, PLASMA	E3/E3	

```
Reference Range:
NOT ESTABLISHED

E3/E3: This combination of isoforms is most common and
suggests an average risk of Alzheimer's disease. Patient
sex, environment, race, ethnicity, and presence of other
risk alleles also contribute to the risk of AD associated
with APOE genotype (1,2). Patients who do not carry the
APOE4 gene are of average risk for amyloid related imaging
abnormalities (ARIA) when receiving amyloid-modifying
therapies (3). (1) Neu et al. JAMA Neurol. 2017;74:1178-1189

characteristics have been determined by Quest Diagnostics.
It has not been cleared or approved by the FDA. This assay
has been validated pursuant to the CLIA regulations and is

Vitamin D Status         25-OH Vitamin D:

Deficiency:                    <20 ng/mL
Insufficiency:             20 - 29 ng/mL
Optimal:                 > or = 30 ng/mL

For 25-OH Vitamin D testing on patients on
D2-supplementation and patients for whom quantitation
of D2 and D3 fractions is required, the QuestAssureD(TM)
25-OH VIT D, (D2,D3), LC/MS/MS is recommended: order
